

Subject: E.U. Regulation REACH

Granollers, June 18th , 2024

Dear Sirs,

We hereby confirm the parts we provide agree to REACH (Registration, Evaluation and Authorisation of Chemicals) regulation 2011/65 and last amendment 2015/863 and they do not require registration.

Please, be aware that the products delivered to your company will be maintained on the market in the framework of this regulation and in conformance with article 7.1 which stipulates that:

The substances contained in the products do not need to be pre-registered as the substance is not intended to be released under normal or reasonably foreseeable conditions of use.

In addition, please, note that only the products made by brass or 12L14 Steel do contain Lead as part of material composition, which was added to the SVHC forbidden substances list in 2018.

However, they are currently accepted, as far as the parts do not exceed 0,5% by weight of the component and as far as the articles made by these materials could not be placed in the mouth by children or protected by plating process.

In addition, please, note our parts do not contain any **Persistent Organic Pollutants (POPs)** substances. So, UE 2019/1021 regulation is not applicable.

Please, do not hesitate to contact us for any further information you may need...

Kind Regards,

Dani Herrero
